ANNUAL REPORT OF THE COMMITTEE OF VISITING JUSTICES OF THE COUNTY LUNATIC ASYLUM, STAFFORD,

FOR THE YEAR ENDING 31st DECEMBER, 1880,
PRESENTED TO THE COURT OF QUARTER SESSIONS,
3rd JANUARY, 1881.

-

During the past year 254 Lunatics have been admitted, of whom 131 were males and 123 females; 96 have been discharged recovered, of whom 48 were males and 48 females; 8 males and 16 females have been discharged relieved to the custody of their friends; 4 females have been transferred to Burntwood Asylum; 2 males have been transferred to other Asylums; 20 females are boarded out at the Carmarthen Asylum; 1 female has been sent to the Workhouse; 64 males and 40 females have died; 2 males were discharged, no signs of insanity being detected by the Medical Officers; leaving in the Asylum 645, viz:—360 males and 285 females.

The average of the recoveries on admissions has been at the rate of 37 per cent., and the average of the deaths on the total numbers under treatment 10 per cent.

The recoveries show an increase of 13 per cent., and the deaths a decrease of 1 per cent. on the previous year.

There are now 1189 Lunatics belonging to the County, viz.:—642 at Stafford, 527 at Burntwood, and 20 at Carmarthen, showing an increase of 38 during the year.

There are vacancies at the Stafford Asylum for 17 males, but the female side is full. The Burnt-wood Asylum is also full on both sides.

At the Midsummer Sessions your Committee reported that the female galleries of the Asylum at Stafford were crowded, and it was ordered that 20 patients be boarded out at a cost not exceeding 15s. per head per week. Arrangements were made with the Visitors of the Carmarthen Asylum to take 20 at 12s. 10d. per head per week.

The Commissioners in Lunacy visited the Asylum in March last when they reported—

"The Wards were everywhere clean, bright, and cheerful, and the beds and bedding in a very creditable condition, the dress of both men and women was excellent, and looked both neat and tidy."

During the year the Bath-rooms in female galleries Nos. 7 and 8 have been converted into associated water-closets; the steamers in the cooking kitchen have been replaced and are now in good working order; the water tanks in the roof have been covered in; several galleries have been painted and papered, and the new sanitary wards are now being done. The County Surveyor reports that the buildings are all in a fair state of repair.

In January last the offer from the Stafford Corporation for the purchase of 28 Acres of Land in Coton Field was accepted, but possession has not

yet been given; plans have been submitted to the Commissioners in Lunacy for the erection of additional wings, and have been sanctioned, but now wait the approval of the Secretary of State.

Your Committee have had to call the attention of the Stafford Town Council to the foul state of the brook passing through the Asylum grounds, but the further consideration of the same has been adjourned for the present.

During the year your Committee have continued to give their time and attention to the supervision of the Asylum; and at their visits have found the duties carried on with order and regularity, and they have again much pleasure in recording its sense of the able management of the Superintendent and the good conduct of the officers and servants.

Signed,

WROTTESLEY, Chairman.

REPORT OF THE COMMISSIONERS IN LUNACY.

County Asylum, Stafford, March 19th, 1880.

We are glad to be able to give a very satisfactory Report as the result of our visit to this Asylum, both as regards the state of the wards and building generally, and the condition, dress, and demeanour of the patients, which we consider reflects credit upon the Medical Superintendent, Mr. Pater, and the rest of the staff.

Just nine months have elapsed since this Asylum was last visited by two Members of our Board. At that time the number of patients on the books There are now 658—355 men and 303 was 640. women. The admissions have been of 105 men and 93 women, and 46 men and 62 women have been discharged, of whom 28 men and 32 women were recovered. 10 men and 18 women were taken out by their friends, and 4 men and 1 woman were sent to workhouses, 2 men and 11 women were discharged relieved, and one man escaped, and another was found not to be insane. With the exception of 2 women, all the patients are chargeable to County Unions, for whom the charge per week is 9s. deaths have been, on the male side 46, and on the female side 26. This death-rate is high as compared with the average in County Asylums, but 14 deaths are assigned to General Paralysis on the male side, and 7 on the same side from Senile Decay. On the female side there are 6 deaths ascribed to Epilepsy.

No other cause of death calls for remark from us in either division. Coroner's inquests were held into the cause of death of one patient of each sex; the verdict in one case was "Exhaustion from Mania," in the other "Effusion into Pericardium and Vomiting." Post mortem examinations were made in only 18 instances, or exactly one-fourth of the number of deaths. We hope it will soon be found practicable to make these very useful and necessary examinations in every case, and we feel sure that no effort will be spared by Mr. Pater to overcome any difficulties which may still present themselves. One woman was absent on leave, whom we did not see, otherwise we have seen all the patients now on the books. They appeared to us to be in the most part in fair bodily health, more especially considering the large number of Epileptics and General Paralytics who are under care here. There are now 72 men and 79 women of the former class, and 26 men and 4 women of the latter. Most of the former class are at night collected in one part at the top of the house in their respective divisions under the constant supervision of an attendant on each side sitting up, who is able to summon the assistance, when needed, of the attendants who sleep on the same floor, but the arrangements are by no means satisfactory, there are 108 men and 99 women who classed as suicidal; of course some of these are included in both classes, but we heard with satisfaction that it was intended to erect two detached blocks with sleeping accommodation for 120 in each block to insure proper care and supervision for this class of patients. The floor in the female epileptic dormitory is of stucco, and will, we hope, soon be altered and a wooden floor substituted, as has already been done in the corresponding dormitory on the

male side. We saw 10 women and 2 men in bed, and 32 women and 22 men were registered as being under medical treatment last week. No patient was either secluded or in restraint at the time of our visit, but the former mode of treatment has been employed in cases of 3 men on six occasions for 57 hours; and of 20 women on 74 occasions for 815 hours; the latter mode of treatment has been resorted to thrice in all; one of each sex have had their arms as far as their elbows fastened to their sides to prevent violence, and for medical treatment one woman was dry packed for five hours.

The behaviour of both sexes was remarkably good, and even in the wards in which the worst class of patients are placed, there was no noise or undue excitement; the dress of both men and women was excellent and looked both neat and tidy, no woman was wearing an exceptional strong dress, and the few men who were clad in such dresses were not able to be easily remarked, as the garb, although made strong and difficult to be torn, in appearance was like an ordinary smock. On the whole, the aspect presented by the patients when out walking would be more of that of ordinary labouring men than of paupers from a Lunatic Asylum; with satisfaction we record that excepting on the score of being detained in the Asylum unduly, from no one did we have any complaints; with regard to one of the patients (J.T.) so complaining, we have had a conversation with the Medical Superintendent, and have requested him to call the special attention of the Committee to his case. No other patient who alleged undue detention was in our opinion fit to have either leave on trial or be discharged. The dinner provided on both sides was good and sufficient, and neatly served, particularly on the female side.

The attendants were respectable in appearance, and up to their duties, and seemed to show tact and discretion in dealing with the patients; they number 27 for the men and 23 for the women; 5 of each sex have not yet completed a 12-months service here. The wages for the men begin at £24 and rise up to £33, with £4 extra if they belong to the band. The charge attendants receive £38 10s. and £43 10s. in some wards. The nurses begin at £15 and rise to £20; the charge nurses getting £22 in some wards and £26 in others.

The wards were everywhere clean, bright and cheerful, and the beds and bedding in a very creditable condition; some of the counterpanes were rather worn and dingy, but we were told that some accident had prevented the use of the drying closet in the Laundry lately and therefore old counterpanes had been brought into use. Associated gatherings of the patients continue to take place frequently, and the band plays once a week on each side. Dances on the Lawn, cricket, theatricals, football, concerts, &c. are amongst the amusements provided; and we learn that during the summer months pic-nics on the neighbouring hills are not unfrequent.

The returns show us that nearly 200 men and 170 women are in some way usefully employed; 68 of these men live in the building which was originally built for an infectious hospital for both sexes. We learn that at Church last Sunday 162 men and 110 women were present, but there is no week-day service held in the Asylum by the Chaplain.

The water-closet accommodation in male 1 and female Infirmary wards is very defective, in the one case there being only 2 closets for 40 males, and in the other 1 closet only for 52 patients and 4 nurses. In many of the wards increased accom-

modation has been obtained by turning the bathrooms into water-closets; this has been found practicable owing to the building of the general bath-room, and we hope that some alteration in these two wards may also be found to remedy the present want of accommodation. Much painting and papering has been done in various wards and galleries, the general effect of which is very good, and the heating and ventilating of the Asylum has received attention. At the January Sessions, 1878, £7,000 was granted for an Epileptic Female Ward; £650 for alterations in Kitchen; £1,200 for additions to Laundry, &c.; and £921 to provide efficient means for the extinction of fire. We learn that the whole of these alterations and additions were standing over until the completion of the purchase of some 28 Acres at the back of the Asylum. We feel sure that the Committee will not delay to commence these improvements, now that we hear that the Bill for the purchase of the land passed yesterday, and we would especially urge the importance of attention being given to the last-mentioned items, for which money was granted, viz.,—the enlargement of the Laundry and provision for the extinction of fire.

Signed,

W. E. FRERE, Commissioners W. RHYS WILLIAMS, in Lunacy.

County Asylum, Stafford,

December 31st, 1880.

My Lords and Gentlemen:

I have the honour to present my Report as your Medical Superintendent for the year 1880. Thanking you for your valuable support,

I have the honour to be,

My Lords and Gentlemen,

Your faithful Servant,

W. THOMPSON PATER.

THE ANNUAL REPORT OF THE SUPERINTENDENT.

County Asylum, Stafford,
December 31st, 1880.

During the year 1880, 131 males and 123 females were admitted, making a total of 254; of these 110 were in feeble health, and 76 were, from the nature of the disease from which they suffered, from its long continuance, from their advanced years, or from other causes; incurable.

46 recoveries took place in the year's admissions, and 32 deaths, whilst 12 patients are now approaching convalescence. Two-thirds of these cures were in cases in which the mental affection had been of less than a month's duration, and 13 in which it had been of but one week's duration; when admitted to the Asylum.

The average period of illness before admission in the 46 cures was 2 months and 20 days; the average period of such illness in the 32 deaths was 9 months and 27 days.

These facts point to the advisability of early Asylum treatment in cases of insanity. Unfortunately, patients, if they be not dangerous to themselves or others, or vicious in their habits, are often deprived of such

treatment during the most curable epoch of their disease, and not until home management has manufactured them into chronic lunatics, or allowed them to advance to death's door, are they taken to an Asylum. Cases have occurred during the past year illustrating this; persons have been sent here in a hopeless condition whose cases would have had a fair prospect of recovery if submitted to earlier treatment. The admissions were 20 less than in 1879, owing probably to the Asylum, until room was afforded by sending people to Carmarthen, being closed against the reception of females from the southern part of the County.

Some savage assaults have been made on attendants and nurses by patients; happily without any very serious results. The large number of suicidal persons in the house and their frequent attempts at self injury have demanded unceasing vigilance on the part of those in charge of them. Notwithstanding the numerous feeble cases and the large number of deaths amongst the aged and the bed-ridden, only one bed-sore has occurred during the year. These facts speak highly for the care exercised by the members of the nursing staff. conduct generally has been satisfactory, and the only changes which have taken place have been amongst the juniors, and I am glad to be able to state that many of the under-attendants and nurses are now of some standing, and are gaining the experience and tact which will qualify them for promotion when the projected new wards are opened.

Ordinary cases only of disease have occurred; there has been no accident at all serious, and no Coroner's inquest has been held.

The assemblage of the suicidal and epileptic patients in one large dormitory under the supervision of a special night-watch, continues to look fairly well, but in a

ward constructed for the purpose, the watching would be more satisfactory and effective. The only wards available for the purpose, being four storeys high, often cannot be used for epileptics when they most require attention, there being difficulty and danger in getting them upstairs.

In the summer a large number of patients went for a pic-nic to Cannock Chase; the pantomime and a fancy dress ball at Christmas were much enjoyed, and these and other amusements and entertainments have had a beneficial effect.

Much work has been done in the building during the past year, largely by the help of patients, and some necessary improvements have been effected.

The painting of the new building is nearly finished. 75 patients occupy it. Its ventilation is perfect, but it is difficult to keep warm during cold weather.

I regret that although some months ago a Committee of the Town Council met the Asylum Committee to discuss the question of the nuisance arising from the foul state of the brook running through the Asylum grounds, nothing whatever has yet been done towards diminishing that nuisance.

To my colleague Mr. Turner, and to the other officers, my best thanks are due for the valuable help they have afforded me in the administration of the establishment.

W. THOMPSON PATER,
Resident Medical Officer and Superintendent.
